

We are a team of qualified trainers and coaches offering bespoke courses, workshops and presentations that promote health and wellbeing, boost self-esteem and raise confidence.

Whether it's becoming job ready or staff investment, we can support your journey with professional guidance, tried and tested courses, training days through person centred delivery.

Focus & Fly CIC was launched by Steve and Tracey in 2013. Both qualified and experienced trainers who, for over 20 years, have been working with vulnerable young people and adults accessing the third sector. The positive feedback given and life changing results reached by participants accessing the original personal development course fuelled the desire to take the courses to those outside the social care system. The team expanded and we utilised additional skills and ideas to extend our services. Our trainers have had experience of working with adults with complex needs to people with dementia. With qualifications in counselling, the arts, youth work, teaching and community development we use our skills, experience and qualifications to provide a safe, holistic and fun service.

Do you feel you need to build confidence, increase self-awareness and esteem or connect to others. Venturing into something new? Contemplating change? Then this course is for you. It is designed to build your resilience and expand your social toolkit to help make the path ahead less daunting.

Our delivery methods

We use a combination of lively activity, the arts and discussion based workshops to encourage a non-threatening learning environment. We aim to ensure that we take into account a range of learning styles by delivering workshops in a fun, diverse and exciting way.

What's in it for participants?

The courses originally aimed to actively bridge the gap back into education, training and employment within a safe, non-judgemental environment. Over the years this became a secondary goal as more learners felt that reducing stress, building confidence and connecting to others was more pressing. The main emphasis of confident connections is moving lives forward in a positive way. Each programme provides the opportunity to action plan towards a safe, positive and healthy future, and most importantly , connect to others and the self.

My course tutor put me at ease making me feel welcome and comfortable. During the course my confidence grew and my anxiety diminished. I found all the sessions fun and useful. The group I did the course with bonded and really worked well as a team by the end.
